**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application,  
and do hereby grant the same, subject to the following limitations and  
conditions:

The amount of water to be appropriated shall be limited to the amount  
which can be applied to beneficial use, and not to exceed 1000 acre feet  
annum.  
cubic-feet per second.

Actual construction work shall begin on or before July 17, 1923.

Proof of commencement of work shall be filed before August 17, 1923.

This permit is issued subject to all prior rights on the source. A maximum of 1,000 acre feet of water is herein allowed for storage purposes, notwithstanding the fact that the map already filed shows the storage capacity of the proposed reservoir to be but 487 acre feet, so that the reservoir may be filled more than once each season. At the time of filing proof of beneficial use and cultural map, applicants will be required to submit such water measurements, affidavits, maps, or other data, as may be required by the State Engineer to show the average amount of water which has actually been stored each season. In order that such water measurements may be secured, a substantial headgate and weir must be installed at or near the point of diversion and a record kept of the flow of water diverted into the reservoir in such manner that the average annual storage can be calculated each season.
